

Education:

- 09/2018 – Present **University of Washington**
Department of Global Health – Metrics and Implementation Science
PhD in Metrics
GPA: 3.8 / 4.0
Dissertation: *Pandemic Preparedness and COVID-19: lessons learned from global and local response, what we can learn from existing preparedness metrics, and how to respond to novel threats*
- 08/2012 – 05/2014 **Emory University**
Rollins School of Public Health
Master of Public Health (MPH) – Biostatistics
GPA: 3.7 / 4.0
- 08/2007 -05/2012 **Pennsylvania State University**
Bachelor of Science (BS) – Biology and French, Statistics minor
GPA: 3.6 / 4.0
- 01/2010-05/2010 **IES Institute Paris, France**
French Language Studies, Spring Study Abroad

Relevant Work Experience:

- 09/2018 – present **Local Burden of Disease, Pandemics & COVID-19 Teams**
Institute for Health Metrics and Evaluation, Seattle WA
Researcher, Pandemics Team *01/2023 – present*
- Developed report of current state of pandemic preparedness and geospatial mapping for WHO R & D Blueprint Priority Pathogens for use and dissemination with global partners and the WHO as Phase I of a multi-phase project
 - Provided technical expertise on a WHO funded grant considering multidimensional risk mapping to guide pandemic preparedness, including development of custom maps of multiplicative risks of spillover and outbreak potential for each of the WHO Blueprint Priority Pathogens, routine meetings with co-investigators, and mentoring of junior staff
 - Assisted with the dissemination of niche map results for mpox, henipaviruses, and MERS via technical, deadline management, and publication support
- Researcher* *09/2020 – 12/2021 & 06/2022-12/2022*
Graduate Research Assistant *01/2022– 06/2022*
- Responsible for weekly production of results from data cleaning through SEIR model estimation and our results briefings used by governors, ministries of health, and other public health governing bodies
 - Used multitude of coding languages and software principles for maintaining a rapid-paced, high quality production pipeline including Python, Linux command line, Git and Github, and R and R Markdown
 - Worked as first author on a manuscript analyzing differences in countries' COVID-19 outcomes including pandemic preparedness indicators, response metrics, and governance variables to better understand this pandemic and prepare for the next
 - Developed a system for flagging routine data issues in our files and worked with engineering team to create a set of files to help with debugging and identifying reporting errors on a weekly basis

Erin N Frame (née Hulland), MPH, PhD

- Developed plots, maps, tables, and text bullets for the results briefings to be automated for rapid dissemination
- Trained junior staff members on data cleaning and quality control processes
- Created quality control products for data extraction analysts to better assess quality and coverage of inputs including testing data, serology data, hospitalizations, cases and deaths
- Provided analytic models and data visualizations of understanding the reasons for vaccine hesitancy among different demographic groups in the United States
- Assisted with the IDM – Gates Ventures training on COVID models by providing context of data and surveillance considerations

Graduate Research Assistant

09/2018 – 06/2020

- Provided maps and geospatial estimates of travel time to nearest health facility given 5x5 km grid cells at risk for viral hemorrhagic fevers in Africa
- Estimated the largest reduction in raw and person-weighted travel time with the simulated placement of a new facility in a given country
- Estimated the travel time to any location at risk for viral hemorrhagic fevers from any point in a given country
- Assisted with literature reviews, data extraction, geo-positioning, and data cleaning of published data on Rift Valley Fever
- Assisted with new grant development and current grant reporting
- Modeled environmental suitability of Monkeypox virus using environmental and species covariates and extracted published literature using generalized boosted regression modeling
- Estimated spillover event potential from animals to humans for Monkeypox considering environmental suitability and populations living in such locations
- Assisted with early database curation of COVID-19 cases globally with demographic data, published March 2020
- Performed a meta-analysis of published systematic reviews of mask effectiveness for respiratory virus transmission including data extraction, processing, code development, documentation and manuscript preparation

06/2020 – 09/2020

Global Development Division – Polio Eradication Team

Bill and Melinda Gates Foundation, Seattle WA

Summer Associate

06/2020 – 09/2020

- Evaluated additional geospatial covariates to improve a random effects model for circulating type 2 vaccine-derived polioviruses
- Forecasted possible district-level transmission in upcoming months to help with outbreak preparedness and response
- Investigated the use of existing friction travel surface in standard human mobility models (radiation and gravity models) for improving infectious disease exposure modeling
- Developed a manuscript draft on ongoing work
- Attended working group sessions on piloting of the novel type 2 oral poliovirus vaccine (nOPV2)

06/2014 – 07/2018

Emergency Response and Recovery Branch

Center for Global Health, US Centers for Disease Control and Prevention, Atlanta GA

Statistician

04/2016 – 07/2018

Junior Biostatistician

06/2014 – 04/2016

- Provided statistical analyses for the Emergency Response and Recovery Branch, Division of Global Health Protection, and external partners including analysis of survey data, descriptive statistics, survival analysis, linear and logistic regression, principal components analysis, propensity score matching, capture-recapture, non-parametric analyses, meta-analyses and sample size calculations

Erin N Frame (née Hulland), MPH, PhD

- Collaborated with branch scientists on and provided sample size calculations and survey designs for various types of international surveys including cross-sectional population surveys, respondent driven sampling, longitudinal surveys, and national-level surveys
- Provided statistical support and mentoring to branch Epidemic Intelligence Service officers, epidemiologists and researchers, CDC Haiti country office and external partners
- Analyzed and disseminated results to key stakeholders regarding clinical outcomes, survival, and sociodemographic disparities among HIV positive patients in Haiti using the national HIV registry
- Developed and conducted multiple trainings in Haiti (in French):
 - Data cleaning and analysis trainings for hospital statisticians / information officers
 - Verbal autopsy survey methods and questionnaire implementation for interviewers
 - EpiSample and Open Data Kit trainings for household selection and data collection for interviewers
 - R programming for beginners for Ministry of Health and CDC Haiti staff
 - Annual training for intermediate-level Field Epidemiology Training Program fellows on study design and sample size calculations
- Assisted with development of grant proposals
- Provided technical assistance to several partner organizations including Ministry of Health in Haiti, the International Organization for Migration, the World Health Organization, among others.

11/2013 - 05/2014

Surveillance and Health Services Research Team

American Cancer Society, Atlanta, GA

Intern

- Performed various data analysis tasks under the supervision of two leading cancer epidemiologists including logistic regression, chi-square analysis, survival curves, and Cox Proportional Hazards models on national cancer registry data using SAS, SEER*Stat, and JoinPoint software
